

Completing a Hazardous Vulnerability Assessment (HVA) Using the 2017 Template

Note – Each worksheet has been protected to prevent unintended changes to formulas. Users can enter/change data only if cells that can be selected.

Facility Info Tab:

Add facility name, current year, and location in the blue cells.

This information will appear in the header of each worksheet.

Hazard Tab

This is similar to the former HVA template. Use the drop down options to populate information for **Probability**, and **Severity** sections. The **Risk** score will automatically calculate as a percentage once these cells have been filled in. The higher the score, the higher the priority.
