

SSP Data Collection

- Helps us understand what is needed vs. what's available and what is working and what is not
- Should align with the program goals
- Should be sufficient to meet needs and never a barrier to service delivery
- Should provide reliable data on key demographics, services provided, needs, and trends in service utilization

SSP Data Collection Sources

- Database
- Participant surveys
- Focus groups and interviews

SSP Data Collection Goals

Data collection should align with the program goals

-Syringes distributed and collected as well as enhanced linkages and referrals are reflected on the SSP monthly reports

-We are working towards improving documentation of successful linkages

SSP Data Collection Needs

- Based on the SSP's 3-pronged approach, are there any data collection needs?
